International Journal of Forecasting 7 (1992) 561–563
North-Holland

Author Index Volume 7 (1991)

(The issue number is given in parentheses)

Abramson, B. and **A. Finizza**, Using belief networks to forecast oil prices (3) 299–315
Adams, G., P.G. Allen and **B.J. Morzuch**, Probability distributions of short-term electricity peak load forecasts (3) 283–297
Ahlburg, D.A., Predicting the job performance of managers: What do the experts know? (4) 467–472
Aksu, C. and **J.Y. Narayan**, Forecasting with vector ARMA and state space methods (1) 17– 30
Allen, P.G., *see* **G. Adams** (3) 283–297
Ang, S. and **M. O'Connor**, The effect of group interaction processes on performance in time series extrapolation (2) 141–149
Arbaugh, J.F., *see* **R.C. Hill** (3) 271–282

Boehm, E.A. and **G.H. Moore**, Financial market forecasts and rates of return based on leading index signals (3) 357–374
Bretschneider, S. and **W. Gorr**, Economic, organizational, and political influences on biases in forecasting state sales tax receipts (4) 457–466
Bridges, E., A.T. Coughlan and **S. Kalish**, New technology adoption in an innovative marketplace: Micro- and macro-level decision making models (3) 257–270
Brocato, J., *see* **K.L. Smith** (2) 155–163
Brown, L.D., Forecast selection when all forecasts are not equally recent (3) 349–356

Cartwright, P.A., *see* **R.C. Hill** (3) 271–282
Chatfield, C. and **A.B. Koehler**, On confusing lead time demand with h-period-ahead forecasts (2) 239–240
Chatfield, C. and **M. Yar**, Prediction intervals for multiplicative Holt-Winters (1) 31– 37
Christofides, L.N., In-sample and out-of-sample forecasts of wage adjustment in indexed and non-indexed labour contracts (2) 171–181
Clemen, R.T., *see* **C.M. Miller** (4) 515–529
Coomes, P.A., A Kalman filter formulation for noisy regional job data (4) 473–481
Coughlan, A.T., *see* **E. Bridges** (3) 257–270

Dabbs, R.E., *see* **K.L. Smith** (2) 155–163
de Gooijer, J.G. and **A. Klein**, On the cumulated multi-step-ahead predictions of vector autoregressive moving average processes (4) 501–513
DeRoeck, R., Editorial: Is there a gap between forecasting theory and practice? A personal view (1) 1– 2

Fernández, A., *see* **J.M. Otero** (4) 483–492
Finizza, A., *see* **B. Abramson** (3) 299–315
Flores, B.E., D.L. Olson and **C. Wolfe**, Judgmental adjustment of forecasts: A comparison of methods (4) 421–433
Franses, P.H., Seasonality, non-stationarity and the forecasting of monthly time series (2) 199–208

Geriner, P.T. and **J.K. Ord**, Automatic forecasting using explanatory variables: A comparative study (2) 127–140
Gilstein, C.Z., *see* **N.P. Greis** (2) 183–197
Gorr, W., *see* **S. Bretschneider** (4) 457–466
Greis, N.P. and **C.Z. Gilstein**, Empirical Bayes methods for telecommunications forecasting (2) 183–197
Guerrero, V.M., ARIMA forecasts with restrictions derived from a structural change (3) 339–347

Hibon, M., *see* **S. Makridakis** (3) 317–330
Hill, R.C., P.A. Cartwright and **J.F. Arbaugh**, The use of biased predictors in marketing research (3) 271–282

Kalish, S., *see* **E. Bridges** (3) 257–270
Klein, A., *see* **J.G. de Gooijer** (4) 501–513
Koehler, A.B., *see* **C. Chatfield** (2) 239–240
Krzysztofowicz, R. and **D. Long**, Forecast sufficiency characteristic: Construction and application (1) 39– 45
Krzysztofowicz, R. and **D. Long**, Beta likelihood models of probabilistic forecasts (1) 47– 55

Lawrence, M., *see* **M. O'Connor** (4) 413–420
Leach, M.L., *see* **L.J. Tashman** (2) 209–230
LeSage, J.P. and **M. Magura**, Using interindustry input-output relations as a Bayesian prior in employment forecasting models (2) 231–238
Lin, M.-W., *see* **L.M. Liu** (1) 3– 16
Liu, L.-M. and **M.-W. Lin**, Forecasting residential consumption of natural gas using monthly and quarterly time series (1) 3– 16
